BUILT TO LAST WITH A POSITIVE ENVIRONMENTAL IMPACT

Outdoor Designs uses high quality fabrics such as Polartec and Primaloft to create durable and eco-friendly products. Polartec focuses on durability by protecting the user against weather such as rain and snow without the use of PFAs. Primaloft uses ultra-fine fibers to trap warmth without overheating using a process to convert recycled plastic bottles into the fibers used to create their insulation. Outdoor Design's utilizes these technologies to create products that are built to last and leave a positive impact on our environment.

OUR STORY

*We like to say there is no such thing as bad weather,
just bad equipment.*

At Outdoor Designs we have been designing performance products since 1992, and we know a thing or two about technical accessories. We test our products to the extreme, and back again, to ensure that you have total peace of mind when it comes to choosing your gear.
